

Pre-Dentistry Track

This schedule represents a recommended plan for the pre-dentistry track. Prerequisites may vary depending on a student's pathway, substitute courses needed, and school of interest. The program may be completed in approximately 15 months.

Course Schedule

Core Courses	Delivery
General Chemistry I	Class / Lab
General Chemistry II	Class / Lab
General College Physics I	Class / Lab
Organic Chemistry I	Class / Lab
Cell Biology	Class / Lab
General College Physics II	Class / Lab
Organic Chemistry II	Class / Lab
Biology-Evolution & Diversity	Class / Lab
Biochemistry I	Class / Lab
Fundamental Microbiology	Class / Lab
Human Anatomy & Physiology	Class / Lab
English (Courses vary)	Class

Recommended Courses
Calculus I
Intro to Psychology
Intro to Sociology
Statistics

Academic Pathways

Career Changers

A bachelor's degree with a major outside of the sciences seeking to complete prerequisite core coursework required for most graduate health professions programs.

Academic Enhancers

A bachelor's degree with any major looking to repeat coursework and/or take additional supporting science courses to strengthen their academic records.

It is recommended students take a social science course if they have not had one in more than five years, specifically Intro to Psychology or Sociology as these subjects are included on the MCAT.

Additionally, Calculus I is recommended prior to applying for medical school. This course may be completed following your program or as a substitution course during the program for students who have already completed one or more of the program requirements.
