

Pre-Physician Assistant Track

This schedule represents a recommended plan for the pre-physician assistant track. Prerequisites may vary depending on a student's pathway, substitute courses needed, and school of interest. The program may be completed in approximately 24 months.

Course Schedule

Core Courses	Delivery
General Chemistry I	Class / Lab
General Chemistry II	Class / Lab
General College Physics I	Class / Lab
Cell Biology	Class / Lab
Organic Chemistry I	Class / Lab
General College Physics II	Class / Lab
Biology-Evolution & Diversity	Class / Lab
Organic Chemistry II	Class / Lab
Biochemistry I	Class / Lab
Introduction to Psychology	Class
Integrated Vertebrate Anatomy & Physiology I	Class / Lab
* Introduction to Statistics	Class
* Statistics & Psychology	Class
Fundamental Microbiology	Class / Lab
Developmental Psychology	Class
Integrated Vertebrate Anatomy & Physiology II	Class / Lab
Medical & Scientific Terminology	Class
Abnormal Psychology	Class

It is recommended students take Calculus I prior to applying for medical school. This course may be taken during or following the program.

Academic Pathways

Career Changers

A bachelor's degree with a major outside of the sciences seeking to complete prerequisite core coursework required for most graduate health professions programs.

Academic Enhancers

A bachelor's degree with any major looking to repeat coursework and/or take additional supporting science courses to strengthen their academic records.

* Either of these courses can be taken to fulfill the requirement.
